Hayesville Downtown Improvement Projects

Martha Eberle DCA Intern Summer 2010

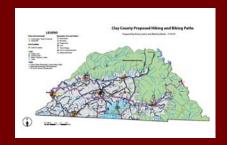

Hayesville Downtown Improvement Projects

Project #1: Hayesville Trail Network

Project #2: Historical and Arts Council Museum

Project #3: Courthouse Square

First Phase: Connector trail between museum and CC/VFW Parks

- Primary Function: Provide a recreation trail for residents of Hayesville and students at Clay County Schools
- Improves the health of users through regular exercise opportunities
- Connects cultural assets of the community: museum, archaeological site

Additional Phases: Connector trail from archaeological site to downtown and Peacock Playhouse

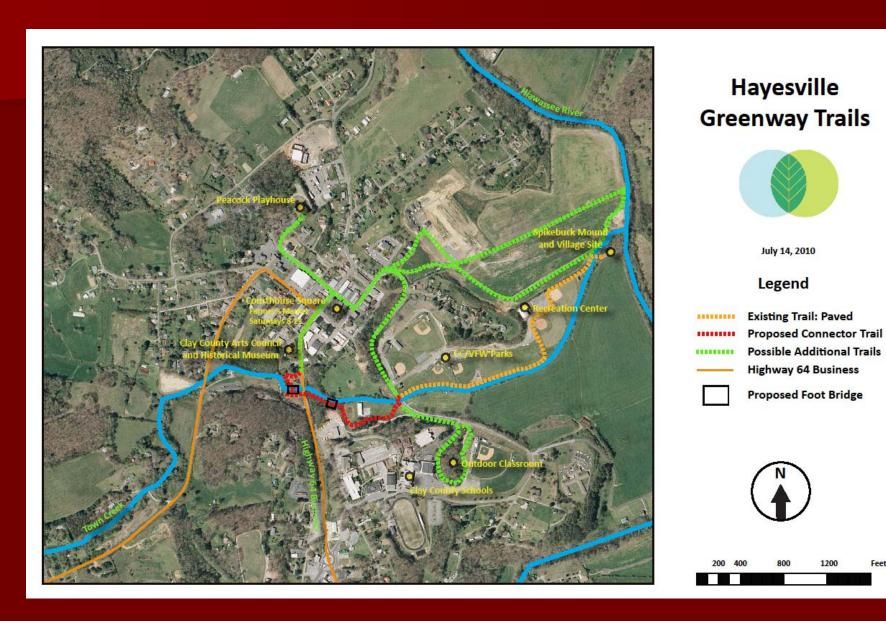

- Primary Function: Complete the trail loop to provides connections to other community resources
- Provides residents additional recreation opportunities and improved connectivity between various parts of town
- Provides visitors an easily navigable path to tour the downtown and other cultural assets of the community
- Provides expanded accessibility throughout town with sidewalk improvements

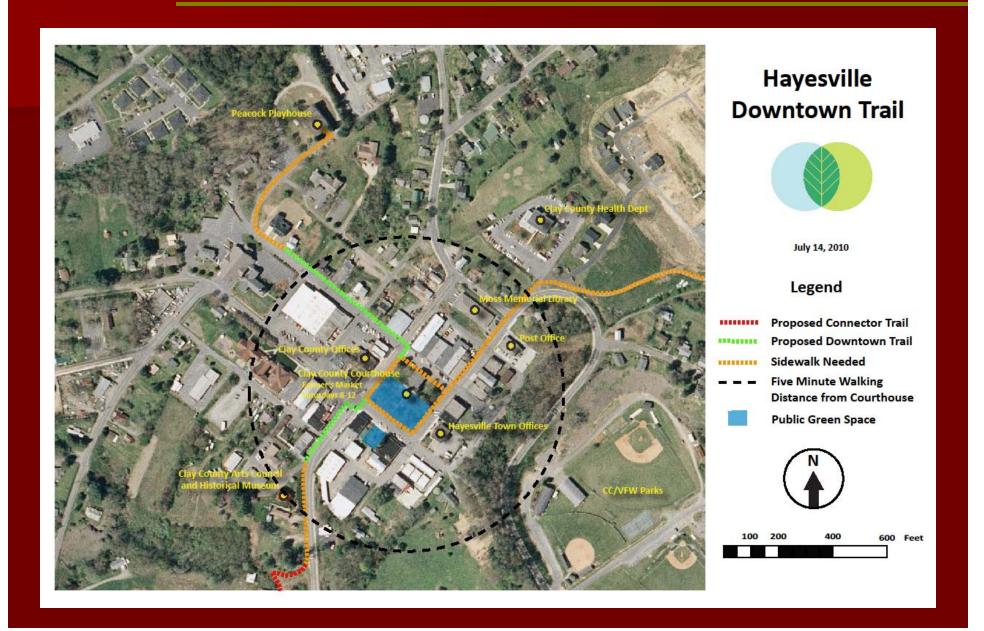

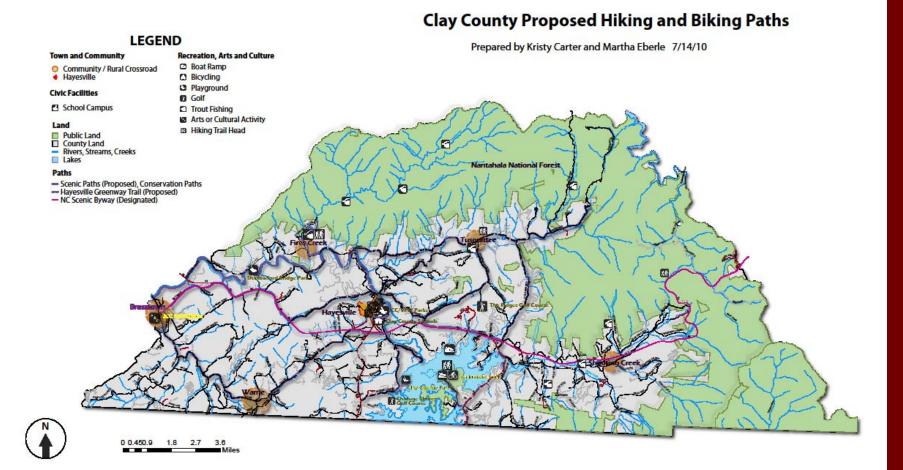

Future Planning Opportunities

- Construction of Hayesville trails initiate the first steps in creating a comprehensive recreational trail system throughout the entire county
- A countywide trail network provides recreational opportunities and improved connectivity for residents
- The network would also be a valuable (and low-impact) draw for tourists seeking recreational activities

Pedestrian and Parking Improvements

- Sidewalk construction along Bus 64 and up to parking lot at main building with wheelchair accessibility
- Construction of a nature trail through the site down to the creek and linking up with the proposed Hayesville connector trail
- Parking lot at main building with landscape improvements to the lot
- Additional parking at lower level with wheel chair accessibility and drop off area
- Designated crosswalk across Bus 64 at lower parking lot

Proposed Improvements: Main Building

- Expand the existing patio in front of building to create additional space for events or leisure
- Further develop the axial relationship between the building and the downtown courthouse square through sight lines and additional pathway
- Plant additional trees in front to reinforce axial relationship and provide shade to vistors
- Rebuild/repair terraces along the east side of property and plant with low-maintenance trees and shrubs with a focus on native plants
- Continue to improve the Cherokee garden along existing stairs

Proposed Improvements: Cherokee Village

- Plant low shrubs around the base of the main interpretive wall and along the top terrace of the wall (to eliminate maintenance requirements)
- Plant large deciduous trees for shade
- Provide moveable seating for small groups under shade trees near summer house
- Create walking path through exhibit connecting to main trail
- Continue developing terraced garden on west hillside
- Plant additional shrubbery around houses (native to region)

Proposed Improvements: Pioneer Village

- Keep some existing pines near house and plant additional trees for shade
- Establish an orchard south of the main house
- Plant a pioneer garden (herbs, flowers) adjacent to the house
- Addition of barn to represent building styles of region

Natural Science Education Area

- Additional building to house natural science exhibits and provide classroom and activity space (with green roof accessible from north)
- Construction of nature trail through property to provide opportunities for wildlife viewing
- Construction of an outdoor classroom/amphitheatre
- Construction of picnic shelter near creek
- Develop a native ricer cane grove near the creek for use in Cherokee projects on site and in the Qualla Boundary
- Maintain and manage a wetland area near the creek for wildlife habitat

Cherokee Village

Primary Goals:

- 1. Showcase the history of the Clay County Courthouse Square while creating comfortable and aesthetically pleasing spaces that are functional for community events
- 2. Provide a "grand entry" into the downtown square from Business 64 that is inviting to visitors and expresses the residents' pride in their community

To Be Done First- Most important steps

- 1. Grind out tree stumps
- 2. Bring in topsoil to sidewalk level, plant grass
- 3. Prune/remove dead/dying trees
- 4. Replant selected trees (avoid on east side of courthouse until regraded)
- 5. Repair stone wall (remove concrete capping), replace end caps at stairs
- 6. Remove round planters
- 7. Install new planting beds at entrances to street
- 8. New trash cans

Next Steps- As funding/public support becomes available

- 1. Regrade east side of courthouse
- 2. Continue planting trees
- 3. Remove rear wall and regrade to deal with road runoff
- 4. Install brick (or faux brick) sidewalk crossings at corners
- 5. Replace concrete walkways with brick walkways or repair damages
- 6. Install additional sidewalks where needed (especially surrounding courthouse square wall)

Big moves to improve the space

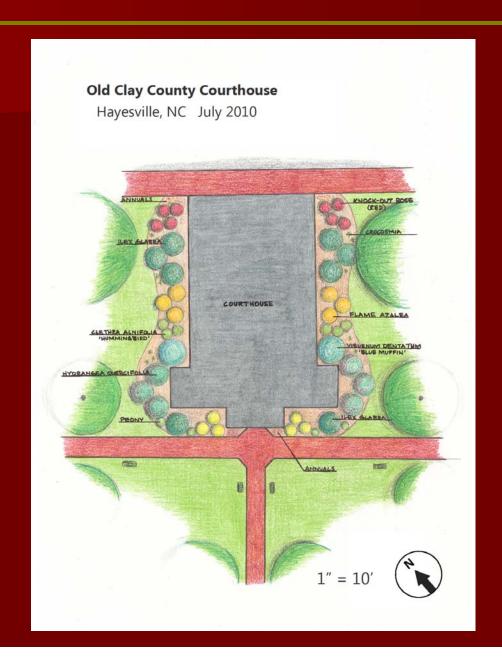

- 1. Install plantings around the building (may need to wait until building renovations are finished)
- 2. Continue sidewalk development in the blocks adjacent to courthouse
- 3. Plant street trees in the central courthouse square block
- 4. Build a plaza at the western corner (entrance to square from 64), redo veterans' memorial
- 5. Continue axial development to library as proposed in NCSU charette in 2008
